

ANTHONY SULLIVAN

ASSOCIATE DIRECTOR, CLOUD ARCHITECTURE

LOUISVILLE, KY

Objective

To serve as a hands-on technical authority for enterprise cloud platform engineering, designing, building, and evolving secure, scalable, and reliable infrastructure that enables engineering teams to build and operate with speed and confidence while advancing the organization's modernization, resiliency and operational excellence goals.

Skills & abilities

Cloud platform engineer and architect with deep expertise in Azure, multi-cloud, public and government cloud environments, and modern DevOps, CI/CD, and containerization practices. Proven ability to design and deliver secure, scalable platforms through strong architecture, automation, Agile execution, technical mentoring, and operational discipline.

Experience

FORTUNE 50 HEALTHCARE COMPANY

Associate Director, Cloud Architecture | October 2022 – Present

- Deliver people leadership, platform strategy, and architectural guidance to enterprise customers and tenants utilizing the Azure Cloud Platform.
- Cultivate and expand strategic partnerships with vendors to advance and support the enterprise cloud journey.
- Foster strong collaboration with EES leaders and partners to enhance overall cloud posture and drive improvements in automation initiatives.

Lead Cloud Architect | October 2019 – October 2022

- Provided architectural guidance and technical direction to enterprise customers and tenants adopting the Azure Cloud Platform.
- Developed, refined, and implemented onboarding processes for the Cloud 3.0 multi-cloud environment, ensuring a seamless transition and optimized adoption.

HMB, INC

Solution Architect/Principal Consultant | November 2018 – September 2019

- Partnered directly with local sales teams to support customer-facing engagements, ensuring accurate solution positioning and positive client outcomes with a focus on Microsoft and Azure cloud technologies.
 - Developed and authored RFP responses, including detailed
-

bottom-up estimates for effort, staffing, fully loaded costs, and delivery risk.

- Designed software and infrastructure architectures for multiple delivery teams, while providing day-to-day technical leadership, conducting code reviews, and driving DevOps adoption and implementation.
- Served as Technical Lead and Solution Architect for an offshore team, delivering daily technical guidance, partnering with clients to define evolving requirements, performing code reviews, and implementing CI/CD pipelines across demo and client environments.

KINDRED HEALTHCARE, INC

Azure Product Team Architect | October 2016 – November 2018

- Championed the organization's adoption of robust CI/CD practices leveraging Azure DevOps and Azure Cloud, providing consultation and guidance for transitioning teams to Agile and Scrum methodologies.
- Acquired comprehensive hands-on experience across Azure platform features, including PaaS (Web Apps, App Service Environment, SQL, Cosmos DB), IaaS solutions, and key infrastructure components such as Virtual Networks and Active Directory.
- Architected and delivered a Cosmos DB-based enterprise search platform unifying disparate data sources into a single configurable and scalable service.

Communication

Strong communicator who translates complex technical concepts into clear business outcomes, aligns stakeholders across engineering and leadership teams, and drives informed decision-making in fast-paced enterprise environments.

Leadership

Provide technical leadership that shapes platform architecture and engineering standards, drives adoption of modern engineering and DevOps practices, and mentors engineers to foster a culture of accountability and innovation to enable efficient, secure, and scalable delivery of enterprise capabilities.
